# Past Photo

Me and my wife visited in Korea last year and we spent time with my parents many times. We got many unforgettable memories including wedding reception and trip to many places especially Busan. I've always interested in taking picture.

# PORTRAIT

It is really fun for me taking picture of others because we all look different. I love taking picture of different angle and face expression. It was really good opportunities for me taking many different models.

# Close up

I found the brightest place of the room and put accessory and took shot. I replaced lens to micro lens. When I found a right focus, I changed to manual mode and took a shot. It was one of the favorite activities this semester.

# Bannack

This was really fun activity. I set up timer for 10 seconds with slow shutter speed. When I press camera button, my model stayed spot for 5 seconds and move to out of camera. This is the way how I took ghost pictures.

# DEPTH

Process: I went to the Rexburg temple to take some picture. I choose sunny day because my last assignment picture was dark. For deep picture, I used f/22 because this makes everything very clear. For shallow picture, I used zoom with f/5.6(This was the lowest number I got) with low ISO. This assignment was a lot of fun and I am very satisfied with result because my photo quality looks better than previous one.

# Motion

I chose home because I wanted to prove that we can get a good picture even inside of the house. I really enjoyed working with camera. Focal Length: 18mm F-stop: f/16 Shutter speed: 2.5sec , Camera: Canon EOS REBEL T3i

# JAKE OH

I am Jake Oh. I am a Web Design major student from Brigham Young University Idaho. I've interested using cameras since I was young. My interest in photography has went up over the years. I am so glad that I was able to learn how to use camera through this semester. My favorite types of photography is Portrait and Macro.
